My Profile(/users/my\_profile)

# Welcome!

Welcome to the Web Stack specialization. The 3 first projects will give you all basics of the Web development: HTML, CSS and Developer tools.

Home (/)

In this project, you will learn how to use HTML tags to structure a web page. No CSS, no styling - don't worry, the final page will be "ugly" it's normal, it's not the purpose of this project.

**Important note: details are important!** lowercase vs uppercase / wrong letter... be careful!

My Planning (/planning/me)

## Resources

Projects (/projects/current)

**Read or watch:**

- HTML 5.2: (/rltoken/3ZeSykXeV9rQhzFiW5GHcg)
- QA Reviews I can make (/corrections/to\_review)
- HTML: HyperText Markup Language | MDN (/rltoken/XWdv6hMca\_9jks7PN2gsbA)
- HTML Reference - A free guide to all HTML elements and attributes
- ? (/rltoken/H59e402e6yV9xtYQW5rvg)
- Evaluation board (/current\_evaluation\_quizzes)
- Can I use... Support tables for HTML5, CSS3, etc (/rltoken/u6RvQ\_45Xpw82AwI82NZcg)
- HTML Cheat Sheet - WebsiteSetup (/rltoken/6SV9798vIh8iehXHnl9Y.Ig)

## Learning Objectives

Requirements (/dashboards/my\_requirements)

At the end of this project, you are expected to be able to explain to anyone (/rltoken/F24I2-

hShauCNkZjwW) **without the help of Google:**

- Which guidelines to follow for HTML
- How to create the skeleton of an HTML 5 page
- How to use semantic HTML tags to structure a web page
- Which use cases to use div vs span

Server (/servers)

- The semantic value's of header, main, footer, article, nav, section, aside
- How to use headings (and why it's important to follow the hierarchical order)
- How to make lists in HTML

Sandbox (/user\_containers/sandbox)

- The differences between medias (SVG, GIF, PNG, JPG)
- How to structure data in a table

Tools (/dashboards/my\_tools)

- How to integrate a video in a webpage
- How to integrate an audio file in a webpage
- How to embed external content

Video on demand (/dashboards/videos)

## Requirements

Peers (/users/peers)

- A README.md file at the root of the folder of the project is mandatory
- Your code should be W3C compliant and validate with W3C-Validator (/rltoken/Q-XyLkED\_pMjSGEuZKb7Fw)

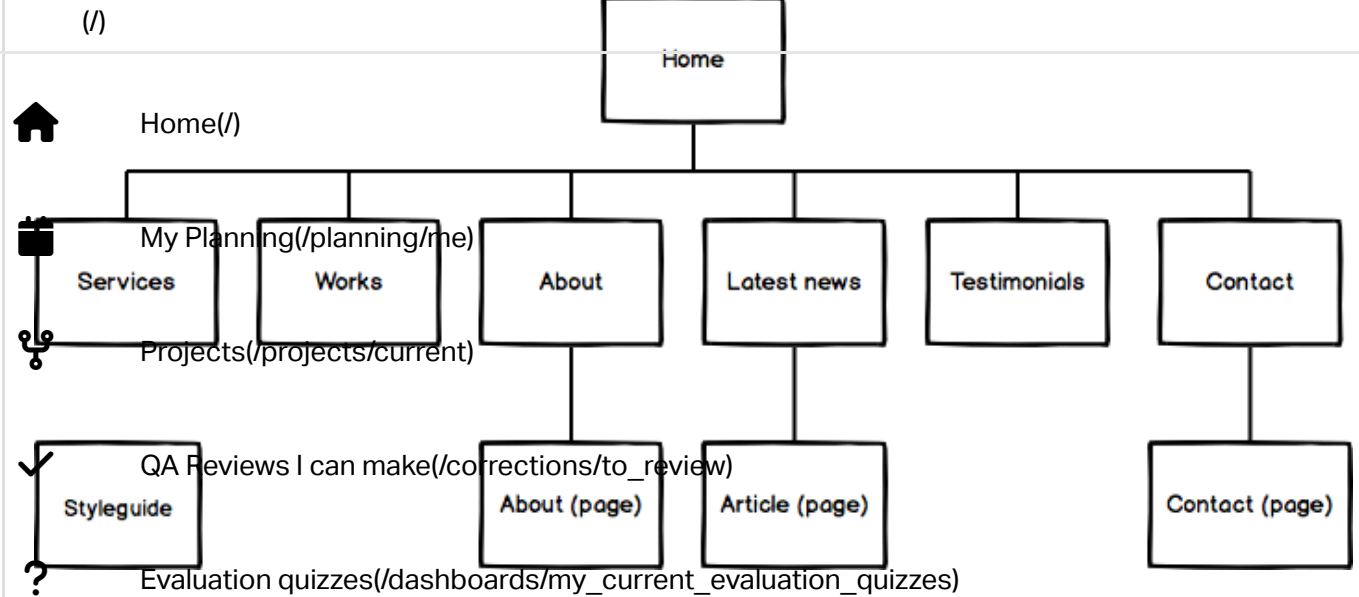

Techium will be the name of the company we will use across our webpages.

## Tasks

### Create your first webpage

Video on demand(/dashboards/videos)

mandatory

Create your first HTML file 0-index.html with:

- Add the doctype on the first line (without any comment)
- After the doctype, open and close a html tag
- Add the language tag, specify English for ISO language code (/rltoken/xBn1Co-FmScJ9Fn8bi6pCQ) and add the direction tag (ltr or rtl) on the html tag.
- Open your file in your browser (the page should be blank)

Discord(<https://discord.com/app>)

W3C won't pass - you can ignore it

Repo:

- My Profile(/users/my\_profile)
- GitHub repository: alx-frontend

- Directory: 0x00-html\_advanced
  - File: 0-index.html
- (/)

Check submission

Home(/)

## 1. Structure your webpage

mandatory

My Planning(/planning/me)

Copy the content of 0-index.html into 1-index.html

### Create the head and body sections

Projects(/projects/current)

- inside the html tag, create the head and body tags (empty) in this order

### W3C won't pass - you can ignore it

QA Reviews/can make (corrections/to\_review)

Evaluation quizzes(/dashboards/my\_current\_evaluation\_quizzes)

- GitHub repository: alx-frontend
- Directory: 0x00-html\_advanced

- File: 1-index.html

Curriculums(/dashboards/my\_curriculums)

Check submission

Concepts(/concepts)

Conference rooms(/dashboards/video\_rooms)

## 2. The head - meta charset, viewport, title, description, favicons

mandatory

Servers(/servers)

Copy the content of 1-index.html into 2-index.html

Sandboxes(/user\_containers/current)

### Meta charset:

- add a meta tag inside the head :
  - add the charset attribute with the value utf-8

### Viewport:

Video on demand(/dashboards/videos)

- add a meta tag inside the head :
  - add an attribute name on the tag and specify that it is the meta viewport
  - add the key width with the value device-width

add the key initial-scale with the value 1.0

- add the key viewport-fit with the value cover

Title: Discord(https://discord.com/app)

- add the title tag just after the meta viewport with value: Homepage - Techium

### Description:

- add a meta tag inside the head section
  - add an attribute name on the tag and specify that is the meta description
  - add another attribute called content

- add the following description: Techium is a digital agency

## Favicons:

(/)

- download the image above to use as a favicon
- Use the tool at <https://realfavicongenerator.net/> (/rltoken/mqMjSrqb5tk95tvvDQwa4A) to generate all the favicon formats
- take the favicon.ico and favicon.png and place these at the root of your project directory, so that it is siblings with your [0-9]+-index.html files.

Home(/)

My Planning(/planning/me)

- inside the head, create 2 link tags with these 3 attributes: rel, type, and href.
  - the first link tag:

Projects(/projects/current)

- type: image/x-icon
- href: ../favicon.ico

QA Reviews I can make(/corrections/to\_review)

- the second link tag:

- rel: icon

Evaluation quizzes(/dashboards/my\_current\_evaluation\_quizzes)

- href: ../favicon.png

## Repo:

Curriculums(/dashboards/my\_curriculums)

- GitHub repository: alx-frontend
- Directory: 0x00-html\_advanced
- File: 2-index.html

Concepts(/concepts)

Conference rooms(/dashboards/video\_rooms)

Check submission

## Simple header, main, footer

Servers(/servers)

mandatory

Copy the content of 2-index.html into 3-index.html

Sandboxes(/user\_containers/current)

## Header:

- create the header of your page between the open and close body tag
- put the text Header inside the header

Tools(/dashboards/my\_tools)

## Main:

Video on demand(/dashboards/videos)

- create the main tag after the header tag
  - put the text Main content inside your main tags

## Footer:

Peers(/users/peers)

- create the footer tag after the main tag
  - put the text Footer inside the footer tags

Discord(<https://discord.com/app>)

## Repo:

- GitHub repository: alx-frontend
- Directory: 0x00-html\_advanced
- File: My Profile(/users/my\_profile)

- File: 3-index.html

(/)

Check submission

4. Aside Home(/)

mandatory

Copy the contents of 3-index.html into article.html

My Planning(/planning/me)

- change the <title> to put: Article - Techium
- inside the main tags
  - after the text, create the aside tags with text Aside

Projects(/projects/current)

QA Reviews I can make(/corrections/to\_review)

Repo:

- GitHub repository: alx-frontend
- Evaluation quizzes(/dashboards/my\_current\_evaluation\_quizzes)
- Directory: 0x00-html\_advanced
- File: article.html

Curriculums(/dashboards/my\_curriculums)

Check submission

Concepts(/concepts)

5. Section Conference rooms(/dashboards/video\_rooms)

mandatory

Copy the content of 3-index.html into 5-index.html

- Servers(/servers)
  - inside your <main> section
  - remove the text in main , create these sections:

1. create first section and put the text Hero section inside
2. create second section and put the text Services section inside
3. create third section and put the text Works section inside

Tools(/dashboards/my\_tools)

- create fourth section and put the text About section inside

5. create fifth section and put the text Latest news section inside
6. create sixth section and put the text Testimonials section inside
7. create seventh section and put the text Contact section inside

Video on demand(/dashboards/videos)

Does not need to pass W3C

Peers(/users/peers)

Repo:

- GitHub repository: alx-frontend
- Discord(<https://discord.com/app>)
- Directory: 0x00-html\_advanced
- File: 5-index.html

Check submission

My Profile(/users/my\_profile)

## 6. Work, News, Testimonial articles

mandatory

Copy the content of 5-index.html into 6-index.html

### Work articles:

Home(/)

- inside the section Works section
  - add 3 article tags

My Planning(/planning/me)

- inside each article write work # where the hashtag will be the ordered number (1, 2, or 3)

### News articles:

Projects(/projects/current)

- inside the section Latest news section
  - add 3 article tags

QA Reviews I can make (/corrections/to\_review)

- inside each article write Article # where the hashtag will be the ordered number (1, 2, or 3)

Evaluation quizzes(/dashboards/my\_current\_evaluation\_quizzes)

### Testimonial articles:

- inside the section Testimonials section
  - add 3 article tags

Curriculums(/dashboards/my\_curriculums)

- inside each article write testimonial # where the hashtag will be the ordered number (1, 2, or 3)

### 3C won't pass, you can ignore it

Don't pass, you can ignore it

### Repo: Conference rooms(/dashboards/video\_rooms)

Sandboxes(/user\_containers/current)

Check submission

Tools(/dashboards/my\_tools)

### Navigation

Video on demand(/dashboards/videos)

mandatory

Copy the content of 6-index.html into 7-index.html

- remove the Header text inside the <header>
- create the nav tag inside the header tag
  - it should remain empty for now

Discord(https://discord.com/app)

### Repo:

- GitHub repository: alx-frontend
- Directory: users/my\_profile

- File: 7-index.html

(/)

Check submission

Home(/)

## 8. Level 1 headings

mandatory

Copy the content of 7-index.html into 8-index.html

My Planning(/planning/me)

- create the level 1 heading inside your main before your sections

o. put text Homepage in your heading tag  
Projects(/projects/current)

**Does not need to pass W3C**

QA Reviews I can make(/corrections/to\_review)

**Repo:**

- GitHub repository: alx-frontend/

Check submission

Concepts(/concepts)

## 9. Level 2 headings

Conference rooms(/dashboards/video\_rooms)

mandatory

Copy the content of 8-index.html into 9-index.html

Servers(/servers)

- in the section tag with the the text Hero section , remove the text and create a level 2 heading with text we help you build your brand!

See boxes(/user/containers/current)

- in the section tag with the the text services section , remove the text and create a level 2 heading with text Services

Tools(/dashboards/my\_tools)  
• in the section tag with the the text works section , remove the text and create a level 2 heading with text works

- in the section tag with the the text About section , remove the text and create a level 2

Videos on demand(/dashboards/videos)

- in the section tag with the the text Latest news section , remove the text and create a level 2 heading with text Latest news

2 Ready users(/users)  
Testimonials

- in the section tag with the the text Contact section , remove the text and create a level 2 heading with text Contact

Discord(https://discord.com/app)

**W3C won't pass - you can ignore it**

(/)

Check submission

Home(/)

## 10. Level 3 headings

mandatory

Copy the content of 9-index.html into 10-index.html

My Planning(/planning/me)

### Services headings:

- Inside the section containing the h2 heading Services , add these elements right after the h2 :
  - create a level 3 heading with text Design & Concept
  - create a level 3 heading with text Digital Strategy
  - create a level 3 heading with text Content Strategy
  - create a level 3 heading with text UX Design
  - create a level 3 heading with text Web Development
  - create a level 3 heading with text Social Media

QA Reviews I can make(/corrections/to\_review)

Evaluation quizzes(/dashboards/my\_current\_evaluation\_quizzes)

### Works headings:

- Inside the section containing the h2 heading Works :
  - in the first article , replace the text with a level 3 heading with text Interior Design
  - in the second article , replace the text with a level 3 heading with text Web Development
  - in the third article , replace the text with a level 3 heading with text Personal Brand

Concepts(/concepts)

### About Us headings:

- Conference rooms(/dashboards/video\_rooms)
- Inside the section containing the h2 heading About Us , after the h2 heading, create these elements in this order:

- a level 3 heading with text who are we
- a level 3 heading with text Our culture
- a level 3 heading with text How we work

Sandboxes(/user\_containers/current)

### Latest news headings:

- Inside the section containing the h2 heading Latest news :
  - in the first article replace the text with a level 3 heading with text Hoc loco tenere se Triarius non potuit.
  - in the second article replace the text with a level 3 heading with text Ut alios omittam, hunc appello, quem ille unum secutus est.
  - in the third article replace the text with a level 3 heading with text Bestiarum vero nullum iudicium puto.

Video on demand(/dashboards/videos)

Peers(/users/peers)

W3C does not need to pass here

## 11. styleguide

mandatory

Home(/)  
Copy the content of 3-index.html into 11-styleguide.html

- change the title to Styleguide - Techium
- remove the text from header , main ,and footer
- create a new <section> inside your main tag
  - create a header in this section
    - in the header add a level 2 heading with text Headings
  - after the header :
    - add a level 1 heading with text Heading level 1
    - add a level 2 heading with text Heading level 2
    - add a level 3 heading with text Heading level 3
    - add a level 4 heading with text Heading level 4
    - add a level 5 heading with text Heading level 5
    - add a level 6 heading with text Heading level 6

Curriculums(/dashboards/my\_curriculums)

Repo:

- Git repository: 0x00-html\_advanced
  - Directory: 0x00-html\_advanced
  - File: 11-styleguide.html
- Conference rooms(/dashboards/video\_rooms)

Check submission  
Servers(/servers)

Sandboxes(/user\_containers/current)

## 12. Paragraphs

mandatory

Tools(/dashboards/my\_tools)  
Copy the content of 10-index.html into 12-index.html

- About Us paragraphs:
- in the About Us section
    - after the first h3 (who are we) create a paragraph with the text: Lorem ipsum dolor sit amet, consectetur adipisicing elit. Ipsum, omnis expedita! Eum, praesentium
- Peers(/users/peers)
- after the second h3 create a paragraph with the text: Lorem ipsum dolor sit amet, consectetur adipisicing elit. Ipsum, omnis expedita! Eum, praesentium cumque accusantium rem, sit quaerat est nisi ratione, deserunt ducimus quidem iste dicta quibusdam atque maxime cum!
- Discord(<https://discord.com/app>)
- after the third h3 create a paragraph with the text: Lorem ipsum dolor sit amet, consectetur adipisicing elit. Ipsum, omnis expedita! Eum, praesentium cumque
- My Profile(/users/my\_profile)

accusantium rem, sit quaerat est nisi ratione, deserunt ducimus quidem iste dicta quibusdam atque maxime cum!

(/)

## Latest news paragraphs:

- in the Latest news section
  - Home(/)
  - in the first article

- create a paragraph with text Career before the heading

My Planning(/planning/my)

- create a paragraph with text Lorem ipsum dolor sit amet, consectetur

- adipiscing elit. Id Sextilius factum negabat. Quo tandem modo? At eum

- nihili facit; Quae contraria sunt his, malane? after the heading

Projects(/projects/current)

- in the second article

- create a paragraph with text Digital Life before the heading

QA Reviews I can make(/corrections/to\_review)

- create a paragraph with text Lorem ipsum dolor sit amet, consectetur

- adipiscing elit. Tum mihi Piso: Quid ergo? Tum ille: Ain tandem? Non

- autem hoc: igitur ne illud quidem. Sed quod proximum fuit non vidit.

Evaluation quizzes(/dashboards/my\_current\_evaluation\_quizzes)

- after the heading

- in the third article

- create a paragraph with text Social before the heading

- create a paragraph with text Lorem ipsum dolor sit amet, consectetur

Curriculums(/dashboards/my\_curriculums)

- adipiscing elit. Non igitur bene. Quid enim est a Chrysippo

- praetermissum in Stoicis? Pugnans Stoici cum Peripateticis. Prioris

Concepts(/concepts)

- generis est docilitas, memoria; Apparet statim, quae sint officia, quae

- actiones. after the heading

## Contact paragraph:

Conference rooms(/dashboards/video\_rooms)

- in the Contact section after the heading

- create a paragraph with the text: Lorem ipsum dolor sit amet, consectetur

Servers(/servers)

- adipiscing elit. Id Sextilius factum negabat. Quo tandem modo? At eum nihili

- facit; Quae contraria sunt his, malane?

## Additional paragraphs (/user\_containers/current)

- below the level 2 Services heading add a paragraph with text We work with you

- below the level 2 Works heading add a paragraph with text Take a look in our portfolio

- below the level 2 About Us heading add a paragraph with text Everything about us

- below the level 2 Testimonials heading add a paragraph with text We are more than a

Video on demand(/dashboards/videos)

- below the level 2 Contact heading add a paragraph with text We like to know new people

## Does not need to pass W3C

QA Reviews I can make(/corrections/to\_review)

## 16. Structure your sections

mandatory

Evaluation quizzes(/dashboards/my\_current\_evaluation\_quizzes)

Copy the contents of 15-index.html into 16-index.html

- in the `div` in the Services section
  - create a header tag that wraps the `h2` and the `p`
  - create a `div` sibling to the header that wraps the rest of the content
- in the `div` in the Works section
  - create a header tag that wraps the `h2` and the `p`
  - create a `div` sibling to the header that wraps the rest of the content
- in the `div` in the About Us section
  - create a header tag that wraps the `h2` and the `p`
  - create a `div` sibling to the header that wraps the rest of the content
- in the `div` in the Latest news section
  - create a header tag that wraps the `h2`
  - create a `div` sibling to the header that wraps the rest of the content
- in the `div` in the Testimonials section
  - create a header tag that wraps the `h2` and the `p`
  - create a `div` sibling to the header that wraps the rest of the content
- in the `div` in the Contact section
  - create a header tag that wraps the `h2` and the first `p`
  - create a `div` sibling to the header that wraps the rest of the content

**W3C does not need to pass**

Repo:

Peers(/users/peers)

- GitHub repository: alx-frontend
- Directory: 0x00-html\_advanced
- Discord(https://discord.com/app)

## 20. Add links

mandatory

Curriculums(/dashboards/my\_curriculums)

Copy the content of 18-index.html into 20-index.html

- in Concepts(/concepts)
  - create a link to / with the text Home
- in Conference rooms(/dashboards/video\_rooms)
  - create an anchor to services with the text Services
  - create an anchor to works with the text Works
- in Servers(/servers)
  - create an anchor to about with the text About
  - create an anchor to latest\_news with the text Latest news
- in Testimonials(/testimonials)
  - create an anchor to testimonials with the text Testimonials
- in Contact (/contact)
  - create an anchor to contact with the text Contact

Sandboxes(/user\_containers/current)

For now, the anchor links will not work. We will make them work in the CSS project.

Does not need to pass W3C

## 26. Examples of lists for the styleguide

My Planning(/planning/me)

mandatory

Copy the content of 13-styleguide.html into 26-styleguide.html

Projects(/projects/current)

### Example of unordered list:

- inside main after Paragraph section, add:
  - QA Reviews I can make(/corrections/to\_review)
  - a new line and a comment with text Lists
  - after, create a new section with inside:

- create a header with inside a level 2 heading with the text Lists
  - Evaluation quizzes(/dashboards/my\_current\_evaluation\_quizzes)
  - after the new header, create a div with inside:
    - a level 3 heading with text Unordered

Curriculums(/dashboards/my\_curriculum) Sagittis adipiscing lorem eleifend., Felis enim feugiat dolore viverra.

### Example of ordered list:

Concepts(/concepts)

- after previous unordered list, in the same div
  - add a level 3 heading with text ordered
- Conference rooms(/dashboards/video\_rooms)
  - add an ordered list with these items:
    1. Dolor pulvinar etiam magna etiam.
    2. Sagittis adipiscing lorem eleifend.
    3. Felis enim feugiat dolore viverra.

### Example of definition list:

Sandboxes(/user\_containers/current)

- after previous ordered list, in the same div
  - add a heading level 3 with text Definition
- Tools(/dashboards/my\_tools)
  - add a definition list with these items:
    1. Term: Definition List title, Definition: Definition text.
    2. Term: startup, Definition: A startup company or startup is a company or temporary organization designed to search for a repeatable and scalable business model.
    3. Term: water, Definition: A colorless, transparent, odorless liquid that

Peers(/users/peers) the seas, lakes, rivers, and rain and is the basis of the fluids of living organisms.

Projects(/projects/current)  
Check submission

## 36. Add images to your sections

QA Reviews I can make(/corrections/to\_review)

mandatory

Copy the content of 35-index.html into 36-index.html

Evaluation quizzes(/dashboards/my\_current\_evaluation\_quizzes)

You can use image generators to get images for this task. For avatar images you can download them on UI Faces (/rltoken/c3jd83yhQuFe\_mY852Rc6w). Just make sure you rename your images to match the task requirements.

### Add three images in the Works section

- in the Works section

before the first level 3 heading create a div

Concepts(/concepts)

- add images/pic-work-01.jpg inside the div

- alt: empty

before the second level 3 heading create a div

Conference rooms(/dashboards/video\_rooms)

- add images/pic-work-02.jpg inside the div

- alt: empty

Servers(/servers)

- before the third level 3 heading create a div

- add images/pic-work-03.jpg inside the div

- alt: empty

Sandboxes(/user\_containers/current)

### Add one image in the About Us section:

- in the About Us section, before the first level 3 heading inside the div
  - add the image images/pic-about-us.jpg

- alt: empty

Video on demand(/dashboards/videos)

- width: 468

- height: 447

### Add three images in the Latest news section:

- in the Latest news section

- in the first article, before the first paragraph, create a div

- in the div add the image images/pic-blog-01.jpg

- alt: empty

- width: 305

- height: 205

- in the second article, before the first paragraph, create a div

- in the div add the image images/pic-blog-02.jpg

My Profile(/users/my\_profile)

- alt: empty

- width: 305
- height: 205

(/) ○ in the third article , before the first paragraph, create a div

- in the div add the image images/pic-blog-03.jpg
- alt: empty
- width: 305
- height: 205

Home(/)

My Planning(/planning/me)

### Add three images in the Testimonials section:

- in the Testimonials section

Projects(/projects/current)

○ in the first article before the quote, add the image images/pic-person-01.jpg

- alt: Yuri Y. avatar

QA Reviews I can make(/corrections/to\_review)

- width: 100px
- height: 100px

○ in the second article before the quote, add the image images/pic-person-02.jpg

Evaluation quizzes(/dashboards/my\_current\_evaluation\_quizzes)

- alt: Desfile dashboard
- width: 100px
- height: 100px

○ in the third article before the quote, add the image images/pic-person-03.jpg

Curriculums(/dashboards/my\_curriculums)

- width: 100px

Concepts(/concepts)

- height: 100px

### Does not need to pass W3C

Conference rooms(/dashboards/video\_rooms)

### Repo:

W3C does not need to pass

Conference rooms(/dashboards/video\_rooms)

Repo:

Servers(/servers)

- GitHub repository: alx-frontend
- Directory: 0x00-html\_advanced
- Sandboxes(/user\_containers/current)

Tools(/dashboards/my\_tools)

Check submission

38. Add a video player in the styleguide

mandatory

Video on demand(/dashboards/videos)

Copy the content of 34-styleguide.html into 38-styleguide.html

- in main after the Details section
  - Peers(/users/peers)
  - add a new line and a comment with text Video
  - create a section

Discord (/discord.com/app)
 

- in the section create a header , in the header add a level 2 heading with the text Video

- after the header add the following video: <https://intranet-projects-files.s3.amazonaws.com/webstack/BigBuckBunny.mp4>
- add controls to the video

My Profile(/users/my\_profile)
 

- ensure that the video does a loop

(/)

- display `https://intranet-projects-files.s3.amazonaws.com/webstack/thumbnail.jpg` when the video is downloading
- provide an alternative text: Sorry, your browser doesn't support HTML5 video

Due to an earlier task, does not need to pass W3C

Repo: My Planning(/planning/me)

- GitHub repository: alx-frontend
- Directory: 0x00-html\_advanced Projects(/projects/current)
- File: 38-styleguide.html

QA Reviews I can make(/corrections/to\_review)

Check submission

39. Add an audio player in the styleguide Evaluation quizzes(/dashboards/my\_current\_evaluation\_quizzes)

mandatory

Copy the content of 38-styleguide.html into 39-styleguide.html

- in main after Video section Curriculum(dashboards/my\_curriculums)

- add a new line and a comment with text Audio
- create a section

Concepts(/concepts)

- in the section create a header , in the header add a level 2 heading with the text Audio

- after the header add the following audio file: `https://intranet-projects-files.s3.amazonaws.com/webstack/TroubleChapter8_64kb.mp3`

- add controls to the audio player
- Servers(/servers) provide an alternative text: Sorry, your browser doesn't support audio element

Due to an earlier task, does not need to pass W3C

Repo: Tools(/dashboards/my\_tools)

- GitHub repository: alx-frontend
- Directory: 0x00-html\_advanced Video on demand(/dashboards/videos)
- File: 39-styleguide.html

Check submission
