Webstack - Portfolio Project

[💼 Group project] [📋 By Planning(/planning/me)] [Front-end] [Back-end] [Portfolio project]

⚙ Weight: 10

👤 Projects(/projects/current)

👥 Project to be done in teams of 4 people (your team: Michael Iyke, Cyril Ugwuoke, Radouane Abounouas)

✔ Project QA Reviews - I can make corrections! to_review took place from Sep 6, 2024 6:00 AM to Oct 8, 2024 6:00 AM

☑ Manual QA review was done on Sep 25, 2024 3:48 PM

? Evaluation quizzes(/dashboards/my_current_evaluation_quizzes)

In a nutshell…

🎓 Curriculums(/dashboards/my_curriculums)

- **Manual QA review:** 79.8/74 mandatory & 15.2/25 optional
- **Altogether: 159.71%**
   - Mandatory: 99.32%
   - 📄 Concepts(/concepts)
   - Optional: 60.8%
   - Calculation: 99.32% + (99.32% * 60.8%) == **159.71%**

💬 **Overall Comment:** Conference rooms(/dashboards/video_rooms)
Good project and collaboration. Good use of Git and GitHub

🖥 Servers(/servers)

Concepts

>_ Sandboxes(/user_containers/current)

For this project, we expect you to look at these concepts:

🔧 - Web Stack Portfolio Project Criteria (/concepts/102912) Tools(/dashboards/my_tools)
- Portfolio Project Idea Bank (/concepts/102161)
- Portfolio Project Review: Introducing Automated Project Review System (/concepts/107416)
- 🎞 Portfolio project (/concepts/548) Video on demand(/dashboards/videos)

👥 Peers(/users/peers)

GO!

🎮 Discord(https://discord.com/app)
Yes it's time to white-board, to code, to troubleshoot bugs, to re-code, to solve other bugs, to refactor, etc..

Development is not a long quiet river, but it can be really fun!

Starting today, you are building **YOUR** project - be proud of it!
My Profile(/users/my_profile)

Evaluation - Show off!

After the pitch, now you will code - nice right? but don't forget you will present it at the end (the Peer Learning Day following this project) in front of professionals and staff.

Have fun!

More info

When you are ready to be reviewed, schedule the portfolio project using the following link to be reviewed by a staff member.

Here is a step by step guide on how to book the review:

how to get your project reviewed

Tasks

0. The presentation   mandatory

Score: 99.03% (*Checks completed: 100.0%*)

You will present your project individually or as a team on a zoom call.

Your presentation, inclusive of the demo, should not exceed 16 minutes. You are expected to provide the following:

- A public GitHub repository for your project.
- A Google Slides presentation including:

  - A brief description of the project and your team.
  - A breakdown of the architecture and the technologies or third-party services used.
  - A report of your developments, highlighting your successes, challenges, areas for improvement, lessons learned, and next steps for your project.
  - A conclusion summarizing your experience.

🔍

Remember, the presentation is a vital part of your project completion, so be sure to include it in your planning to avoid any delays in submission.

1. Video Demo of your project

mandatory

Score: 98.57% (*Checks completed: 100.0%*)

Alongside your project presentation, we require a short video demo, no longer than 3 minutes, that showcases the essential features of your project, illustrating how they all work together. This could take the form of a user walkthrough.

We've created a tutorial video to inspire you with our expectations. Think of it as an inspirational tool, **not a strict template**, designed to help you effectively showcase your brilliant work. Your creativity and individual touch will make your demo even more engaging.

Portfolio Project Demo

A few points to consider while preparing your video:

- **Maximum Video Duration**: The video should not exceed **3 minutes**, ensuring it is concise and engaging.

- **Background Music**: If you include background music, ensure it's **copyright-free** to avoid potential legal issues.

- **Voice-Overs**: Feel free to use your voice to guide us through your project. Ensure your voice is clear, audible, and not overshadowed by the background music.

- **Recommended Tools**: We suggest using

    Recording: Zoom (record + screenshare), Loom, Camtasia, etc
    - **Editing tools** such as: Filmora Wondershare, Camtasia for your video creation.
    - **How to share**: YouTube (or, if blocked in your country, use a similar site), or a cloud storage service (G-drive, One-drive, etc). Submit the URL of your video. **Make sure your video is accessible to the public** - On YouTube, it's fine to flag it as **"unlisted,"** but don't flag it as **"private"**

Please note that your project will not be considered complete without this video submission. It forms an integral part of your final project assessment.

So, let's see your creativity in action.

We are eagerly awaiting your presentations and demo videos.

Happy building,

Good use of Version Control   [mandatory]

Score: 99.72% (*Checks completed: 100.0%*)

You must demonstrate a good understanding of version control through effective use in your portfolio project. This include:

- Committing as often as possible
- using descriptive and professional commit messages
- collaboration through the use of branches and pull requests

[View results]

2. Quality of presentation and project

#advanced

Score: 60.8% (*Checks completed: 80.0%*)

The complexity, quality and curiosity that you put in your project is important - go beyond your limit and surprise us!
